I, Andrew Stephen Lincoln, of RSD Bonang Road, Goongerah in the State of Victoria MAKE
OATH AND SAY as follows:

1. I live in Goongerah in East Gippsland. I have lived there for about 8 months. I previously lived in Melbourne.
2. On a voluntary basis and full time, I undertake surveys of native fauna species in the East Gippsland area. I do this because I am concerned and interested in the protection and conservation of native fauna and flora in East Gippsland. I give the results of my surveys to the Department of Sustainability & Environment and Environment East Gippsland Inc and other people and organisations that contact me and ask for a copy of my surveys, including The Wilderness Society. I have produced about 6 reports over the last 8 months.
3. I make this affidavit from my own knowledge.

4. On about 14 August 2009, I set up an infrared and motion sensor camera near Brown Mountain Creek at the following location: 55H 0655834 // 5874892 using UTM/UPS, GDA94 format. I did this because I understood the area may be subject to logging and I was concerned that threatened species inhabited the area. I use infrared and motion sensor cameras as a key part of my surveys for the purpose of detecting species of fauna.
5. The location of the camera is identified with an "X" on the map that is now produced and shown to me and marked "ASL-1".
6. At about 12:30pm on Saturday, 22 August 2009, I attended that location and recovered the footage for the first time since the camera was set up. Now produced and shown to me and marked "ASL-2" is a true copy of the footage on a DVD.
7. I created a still image of one part of the footage. Now produced and shown to me and marked "ASL-3" is a true copy of the still image that I produced.
